

**IN THE SPECIFICATION:**

Please replace paragraph [0025] of the original specification with the following replacement paragraph.

[0025] As can be seen in FIGS. 3 and 4, a wire retainer 110 has a first foot portion 122, a second foot portion 124, an interconnecting portion 126 and apertures 130. The interconnecting portion 126 connects the first foot portion 122 to the second foot portion 124. At least three apertures are provided through the interconnecting portion 126 corresponding to and aligned with the apertures 130 of the first and second foot portions. The apertures through the interconnecting portion 126 being substantially axially parallel to and aligned with the apertures 130 of the first and second foot portions. In addition, the first foot portion 122, second foot portion 124, and interconnecting portion 126 may form a single body 120.
